

ArChine Arcmetal HTS 1200**High-temp Grease****Description**

ArChine Arcmetal HTS 1200 contains transition metals and other additives, it is a high-temp grease.

Application

ArChine Arcmetal HTS 1200 can be used in high-temp environment, to be used to remove the screw fasteners

Used in corrosive environments, for example: the turbine engine, high-temp valve and seals.

Advantages

Have wide work temperature, can bear high pressure;

High viscosity index, base oil is synthesis oil

Good anti-corrosive

Technical Data

ArChine Arcmetal HTS 1200	
Appearance	Uniform Paste
Thickener	High performance thickener
Base oil	Synthesis
Drop point	No
NLGI	NLGI-1
Operation temperature °C	-40~1200
