

ArChine Arcsili SOG 130**Introduction:**

The product based on advanced silicone oil and add the antioxidant, extreme pressure anti-wear, rust and other additives upon lithium soap thickener refined.

Application:

1. high temperature performance, low temperature start / run more sophisticated machinery and equipment. Field devices (such as automotive isolators, cryogenic liquid pump motors, snow machines, low temperature work gear / bearings, etc.) have better lubricity.

2. Excellent chemical stability. The product have good lubrication to mechanical equipment which regular contacts with the chemical media and in acid-base working conditions (such as iron and steel, printing and dyeing, chemical industry, oil, etc.) .

Advantage:

1. Using a special synthetic base oil to extend the service time
2. Excellent lubrication performance, compatibility special extreme pressure anti-wear agent and withstand heavy loads
3. Excellent oxidation stability; long work time; no maintenance
4. Excellent chemical stability and it can be used in harsh conditions
5. Excellent high or low temperature performance for a wide temperature range

Technical Data:

ArChine Arcsili SOG 130		
	NLGI-2	NLGI-1
Appearance	Cream	
Drip point, °C	200	
Copper Strip Test (T ₂ Copper, 100°C, 24h)	Copper no green or black change
