

## ArChine Bearing 220

### Description

ArChine Bearing 220 is a semi-fluid bearing grease. It contains EP additive, and many other additives, for example: antirust, oxygen resist.

ArChine Bearing 220 has many advantages, for example: EP performance, wide temperature application range, outstanding lubrication properties, high resistance to ageing, outstandingly adherent to materials, reduce noise, and so on.

### Application

ArChine Bearing 220 suits of lubricating running components at high temperature, the temperature can reach to 250°C.

ArChine Bearing 220 is designed for lubricating and seal of bearing, chain, wheel, and so on.

ArChine Bearing 220 also suits of lubricating mixture of plastic and metal.

Operation temperature: -40°C~220°C

### Technical Data

ArChine Bearing 220		
NLGI	NLGI 0	NLGI 1
Appearance	Smooth and bright	
Drop point, °C	300	
Oil separation (100°C, 24h) , % ≤	5	
Evaporation (220°C, 24h) , % ≤	2	
Water washout characteristics, % ≤	3	
Corrosiveness resistant, 52°C, 48h) , ≤	1	
Freezing point, °C	-38	
Four ball method ,N	4000
