

ArChine Alloydraw SS 280**CHLORINE FREE NEAT FORMING OIL****Description**

ArChine Alloydraw SS 280 is a medium viscosity, chlorine and heavy metal free drawing oil. It is specifically developed for light duty drawing operations on steel and aluminium.

Application

ArChine Alloydraw SS 280 is specially formulated for use in single die and progressive die presses for light duty deep drawing applications. It is suitable for use on steel, aluminium and aluminium alloys.

ArChine Alloydraw SS 280 is also suitable for a wide variety of other forming applications including: drawing, deep drawing, and wire drawing.

Advantages

Chlorine and heavy metals-free technology helps improving the environmental profile and minimises waste disposal costs.

Superior adhesion and wetting performance provide homogenous lubricating film which delivers a bright surface finish, especially on softer materials.

Contains high performance lubricity and anti wear additives. Maximises die life and provides excellent surface finish. Minimises costs associated with die repolishing.

Excellent detergency. Versatile, can offer opportunities for product consolidation.

Low odour. Excellent operator acceptance

TYPICAL PROPERTIES

	ArChine Alloydraw SS 280
Viscosity: cSt.@40°C	280
