

ArChine Alloydraw SS 350W

ArChine Alloydraw SS 350W is a synthetic forming oil for extremely heavy drawing applications.

ArChine Alloydraw SS 350W contains no chlorinated paraffins, heavy metals, phenols, or nitrites.

Application

ArChine Alloydraw SS 350W is designed for heavy duty deep drawing on ferrous and nonferrous alloys.

Advantages

Outstanding lubrication properties improve part quality and extends die life.

Chlorine free technology helps meet environmental goals.

Versatile and multi-metal compatibility allows for the use of a single product for multiple applications.

TYPICAL PROPERTIES

	ArChine Alloydraw SS 350W
Viscosity: cSt. @40°C	350
