

## Barimol Heavy Grease

Barimol Heavy Grease is a multi-purpose, extremely tenacious grease with excellent water and shock resistant characteristics. This grease operates over a wide temperature range and has outstanding adhesive and cohesive properties which enable it to repel water. Semisynthetic base oil and oxidation inhibitors guard against grease degradation during use so increasing equipment life and reducing maintenance costs.

Barimol Heavy Grease contains a molybdenum disulphide additive to increase the extreme pressure properties and allow short duration “dry” lubrication, should a grease application be missed.

Typical properties*	Barimol Heavy Grease
Soap type	Barium
Base oil Viscosity, cSt, 40°C	111.1
100°C	11.5
Oil Pour Point, °C	-18
Worked Penetration at 25°C	299
Dropping Point, °C	239
