

GRS-900-F

Food Grade Grease

PRODUCT DESCRIPTION

GRS-900-F Grease is an advanced food grade lubricant specially formulated to deliver premium performance and food grade purity.

GRS-900-F has a high dropping point, good low temperature pumpability and excellent resistance to water wash-out. In addition, it has superior anti-wear and EP properties, as well as protecting against corrosion.

GRS-900-F grease is recommended for the lubrication of the sleeve and anti friction bearings, slides, guides, and couplings found on food processing machinery.

GRS-900-F meets the highest food industry standards: USDA H1 approval for incidental food contact applications and FDA regulation CER 21 178.3570. It is also certified for use in the preparation of Kosher food.

TYPICAL CHARACTERISTICS

Dropping Point °C	250
Viscosity	
@40°C	160
@100°C	14
Worked Penetration	
@25°C	300
Soap Type	Al Compl
