## Getriebeöl-Additiv (Gear Oil Additive)

### DESCRIPTION

Gear Oil Additive is a stabilised solid lubricant concentrate in mineral oil. Due to its high MoS<sub>2</sub> content and special additives, it is suitable for all manual motor vehicle transmissions and for axle drives without self-locking differential.

### PROPERTIES

- reduces friction and wear
- improves gear change performance
- stable under continuous high loads
- boosts operating reliability
- reduces transmission noise
- increases smoothness and limp-home properties
- secures optimum transmission operation

### TECHNICAL DATA

|                             |   |                                 |
|-----------------------------|---|---------------------------------|
| Colour                      | : | grey-black                      |
| content                     | : | Solids approx. 10 %             |
| Viscosity at 20 °C          | : | 380 mPa*s                       |
| Operating temperature range | : | depends on the oil used         |
| MoS <sub>2</sub>            | : | above 400 °C                    |
| Pour point                  | : | Flash point: > 200 °C<br>-15 °C |

### APPLICATION

Added to motor vehicle manual transmissions, axle drives, differential transmissions and mechanical steering systems. Not suitable for fully automatic transmissions and self-locking differential transmissions.

### INSTRUCTIONS

Add Gear Oil Additive to the gear oil – mixing takes place automatically during operation. The product is suitable for both mineral- and synthetic-based gear oils. One tube is sufficient for up to 2 litres of gear oil (corresponds to a concentration of 1 wt %). In extreme cases, add at a rate of 2 %.

### AVAILABLE PACK SIZE

|                   |           |          |      |
