## Benzin System Pflege (Petrol System Treatment)

### DESCRIPTION

Petrol System Treatment is a highly effective combination of agents for treating and protecting all petrol injection systems. The agents primarily contribute to protecting all the components of the fuel system from corrosion and wear as well as treating them to prevent the formation of deposits.

### PROPERTIES

- treats and protects the injection system as well as all the components of the fuel system from corrosion, wear and fuel residues
- effective in all injection systems
- secures the optimum drivability and low fuel consumption
- guarantees low levels of pollutants in the exhaust
- increases operational reliability and economy
- maintains engine performance
- provides for a constant optimum mixture
- tested for catalytic converter compatibility

### TECHNICAL DATA

Basis	: agents/carrier fluid
Colour	: pale brown
Density at 15 °C	: 0.816 g/cm <sup>3</sup>
Regulation on flammable liquids (Germany)	: A III
Flash point	: 63 °C

### APPLICATION

Used for petrol injection systems with or without turbocharging.

### INSTRUCTIONS

For preventive maintenance, add to the fuel tank every 2,000 km. The product mixes with the fuel automatically. The contents of one 300 ml can is sufficient for up to 75 litres of fuel.

**With a long-term effect lasting around 2,000 km**

### AVAILABLE PACK SIZE

Petrol System Treatment	300 ml	Part no. 5108
