megol Kupferpaste

megol copper paste is a high quality, heat-resistant lubricant compound that is resistant to adhesion and centrifugation and contains active metal pigments. Particularly suitable for the easy, straightforward dismantling work after lengthy periods of operation.

Properties:

- High temperature resistance
- Extremely resistant to adhesion and centrifugation
- Resistant to saltwater, hot water and splashing
- Prevents vibration transfer
- Long term corrosion protection
- High pressure resistance
- Active lubricant and separator
- Prevents welding and heat seizure
- Prevents and eliminates brake squeal
- Suitable for universal use

Applications:

Specially for noise damping and repairs on brakes:
Disc and drum brakes

Corrosion protection and lubrication of components:
Hinges, joints, screws, etc.

Lubrication and separation protection for welding, heat seizure and jamming for components exposed to high temperatures:
Exhaust systems, heat exchangers, boilers, turbines, fittings, etc.

Use:

Brakes:

Clean the parts you wish to treat, for example the rear, contact surfaces and fastening parts for brake pads, and apply a suitable amount of copper paste.

Repairs and preventive maintenance:

Clean the parts you wish to treat and apply a suitable amount of copper paste as set out in the maintenance instructions.

Temperature range:

-30 to +1100°C
