### **megol Kühlerfrostschutz**

megol Kühlerfrostschutz is a high quality ethylene glycol-based anti-freeze, which must be diluted with water before use. It contains specific additives that protect all metallic parts, including aluminium alloys, of the cooling system of petrol and diesel engines from corrosion and rust, prevent the formation of foam and guarantee optimal protection from cavitation. In addition it does not harm the coating, hose and seal materials currently in use. Petrogel anti-freeze S contains no nitrite, phosphate or amine and is compatible with all conventional quality anti-freeze products. Tap water of drinking quality is ideal for using with it. Petrogel anti-freeze S meets the conditions of the automotive industry and is suitable for use in all licensed motor vehicles in Europe.
