**Biodegradable, highly concentrated safety rust remover**

Free of mineral acids – environmentally safe – very good material compatibility

**RIVOLTA B.S.E.** removes rust scale and other corrosion residues as well as lime deposits.

**RIVOLTA B.S.E.** is used by the industry, craftman’s shops, in workshops, motor vehicle pools, timber yards, purification plants etc.

**RIVOLTA B.S.E.** can be mixed with water in any ratio up to 1:30. The ratio of mixture for the use of B.S.E. depends on the chemical nature of the residues and the thickness of the residues. For the highest rate of dissolution of rust B.S.E. should be used at a temperature up to 70 °C.

**RIVOLTA B.S.E.** can be used for many cleaning-procedures like immersion, washing, brushing, sprinkling and in ultrasonic applications.

Colour: testaceous

Odour: faint

Technical data	Unit of measurement	Norm	B.S.E.
Density (20 °C)	g/ml	DIN 51757	1.14
Flashpoint	°C	-	none
pH value (10% solution)	-	-	2.2

**Material-attack:** RIVOLTA B.S.E. is not aggressive to common paints, lacquers, plastics and rubber.  
B.S.E. is not suitable for zinc and zinc-coated surfaces.  
After treatment of aluminium the surface has to be flushed with water.

**RIVOLTA B.S.E.** contains corrosion-inhibitors. Shiny metal parts are short term protected against corrosion or rust film. For a long-term conservation we recommend rinsing with water and follow-on treatment with our corrosion inhibiting products of the RIVOLTA K.S.P.-line.

This text contains facts and statements and is determined with our best knowledge and will be checked continuously. These statements are depending - among other reasons - on experiences gained in the industry. We only pass them on without liability. Before using our products you should test the applicability and you should convince yourself about the satisfactory performance. Our application examples and suggestions should not request to violate patent rights.
