

UCON Fluids&Lubricants Shanghai Ping Yiao Trading Co.,Ltd

UCON Water Soluble

UCON™ water soluble base stocks are sold as fluids and lubricants alone or are bought by formulators or marketers as a base to add their own additives for creating their own lubricant. Water soluble base stocks are preferred when washability is essential. These lubricants are used in the fiber, metal working, and the sugar beet processing industries. With several water soluble base stocks in our product line, choosing the right fluid can be a challenge. The table below lists the typical viscosity† to help you select which base stock will meet your needs.
